

## STATEMENT OF INFORMED CONSENT

Our names are Vladimir Bok and Megan Quintero. We are students at Harvard University performing research in Human-Computer Interaction with respect to metabolic conditioning performance measurement. We can be contacted by phone at (713) 705-7992 or by email at [mmquint@college.harvard.edu](mailto:mmquint@college.harvard.edu).

If you volunteer to participate in this study, you may be asked to complete a series of metabolic conditioning moves. We will make written notes of our session as well as be collecting a data file based upon your performance. If you give permission, your interactions with the system may be recorded on video, audio, and/or via other means. Participation in this session should take approximately one half hour of your time.

The result of this research will be used for educational and research purposes. They will be incorporated into reports on this project that will be placed on a Harvard University educational website that is public and may be used in presentation by us and by Harvard to illustrate the work that we do and/or to help advance engineering or educational work. With the exception of photographic, video, or audio records for which you provide a release, no identifying information will be included in these reports or presentations.

There are no benefits to you for participating, other than what may be an educational experience in using some new technologies and learning about the design process. Participation in this process might also increase your comfort in using the Microsoft Kinect technology. We also hope that this will be a fun and interesting process for you. We expect that this research poses no risks to you other than those normally encountered in daily life. Please do not disclose any information that you feel would put you at risk.

All of the information from your session will be kept confidential and be referred to by an ID number of pseudonym. The correspondence between your name and ID number will be kept confidential and treated with the same care as our own confidential information. The result of our work will be presented on a public web site. We will not name you if you and when we discuss your behavior on that web site or in research publications. After the research is completed, we may save the notes for future use by ourselves or others. However, this same confidentiality guarantees given here will apply to future storage and use of the materials.

Your participation in this research is voluntary, and you are free to refuse to participate or quit the experiment at any time without penalty.

If you have any future questions or concerns, you can contact prof. Krzysztof Gajos who is teaching this course. He can be reached at [kgajos@eecs.harvard.edu](mailto:kgajos@eecs.harvard.edu) or at (617) 496-1876.

You may keep a copy of this form for reference. If you accept these terms, please say so. To protect your privacy, we do not require written consent from you.

## RECORDS RELEASE

- Vladimir Bok [vladimirbok@college.harvard.edu](mailto:vladimirbok@college.harvard.edu) (617) 939-1419

- Megan Quintero [mmquint@college.harvard.edu](mailto:mmquint@college.harvard.edu) (713) 705-7992

As part of our study, we are asking for your consent to make a recording of our session. Please use this form to indicate what recordings we can make to help us in this research. This is completely up to you. We will use these records to help us understand and recall the content of this session. We may also share the recordings with our course instructor (who is supervising this work) and our fitness experts, who will allow us to measure the project's success. In any use of these records, your name will not be disclosed.

During the session, the following recordings may be made:

photographic	YES	NO
audio	YES	NO
video	YES	NO

We would also like you to indicate which, if any, more public uses of these recordings you are willing to consent to. Please initial below all those statements that you agree to. If you wish, you may modify the statements below to better express your wishes; please initial next to any changes you make as well as at the end of each statement to which you agree.

Excerpts from the recordings may be shared with other students in this course to aid in our mutual education.

YES NO

Excerpts from the recordings may be displayed on a public web site documenting this project.

YES NO

Excerpts from the recordings may be used in scientific or educational publications.

YES NO

Excerpts from the recordings may be shown at meetings of scientists interested in the study of human-computer interaction and interaction design or at meetings of educators interested in design, engineering, or innovations in education.

YES NO

Excerpts from the recordings may be shown in public presentations to nonscientific groups.

YES NO

I have read the description and give my consent from the use of the records as indicated above.
